

IN THE CLAIMS:

- 1 (original). A pair of swimming goggles comprising:  
an eye cup portion for protecting eyes of a user;  
a belt which is connected to the eye cup portion; and  
a connecting/disconnecting mechanism provided on the belt, the  
connecting/disconnecting mechanism being used when the user puts the goggles on and off  
his/her head
- 2 (original). The pair of swimming goggles according to claim 1, wherein a back portion of the  
belt which fits to the user's occipital region is made wider and side portions of the belt which fit  
to the user's temporal region are made narrower.
- 3 (currently amended). The pair of swimming goggles according to claim 1 ~~one of claims 1 and~~  
2, wherein the belt has a hard portion and a soft portion, and a connected area of the belt with  
the eye cup portion is formed with the hard portion.
- 4 (cancelled)
- 5 (cancelled)
- 6 (cancelled)
- 7 (cancelled)
- 8 (cancelled)
- 9 (cancelled)
- 10 (new). The pair of swimming goggles according to claim 2, wherein the belt has a hard  
portion and a soft portion, and a connected area of the belt with the eye cup portion is formed  
with the hard portion.
- 11 (new). The pair of swimming goggles according to claim 1, wherein the eye cup portion is  
provided with projections on its both sides, and the belt is provided with holes corresponding to

the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the corresponding holes of the belt.

12 (new). The pair of swimming goggles according to claim 1, wherein the eye cup portion is provided with holes on its both sides, and the belt is provided with projections corresponding to the holes so that the belt and the eye cup portion are connected together by inserting the projections of the belt into the corresponding holes of the eye cup portion.

13 (new). The pair of swimming goggles according to claim 2, wherein the eye cup portion is provided with projections on its both sides, and the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the corresponding holes of the belt.

14 (new). The pair of swimming goggles according to claim 2, wherein the eye cup portion is provided with holes on its both sides, and the belt is provided with projections corresponding to the holes so that the belt and the eye cup portion are connected together by inserting the projections of the belt into the corresponding holes of the eye cup portion.

15 (new). The pair of swimming goggles according to claim 3, wherein the eye cup portion is provided with projections on its both sides, and the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the corresponding holes of the belt.

16 (new). The pair of swimming goggles according to claim 3, wherein the eye cup portion is provided with holes on its both sides, and the belt is provided with projections corresponding to the holes so that the belt and the eye cup portion are connected together by inserting the projections of the belt into the corresponding holes of the eye cup portion.

17 (new). The pair of swimming goggles according to claim 10, wherein the eye cup portion is provided with projections on its both sides, and the belt is provided with holes corresponding to

the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the corresponding holes of the belt.

18 (new). The pair of swimming goggles according to claim 10, wherein the eye cup portion is provided with holes on its both sides, and the belt is provided with projections corresponding to the holes so that the belt and the eye cup portion are connected together by inserting the projections of the belt into the corresponding holes of the eye cup portion.

19 (new). The pair of swimming goggles according to claim 3, wherein the eye cup portion is provided with projections on its both sides, and the hard portion of the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the holes of the belt.

20 (new). The pair of swimming goggles according to claim 10, wherein the eye cup portion is provided with projections on its both sides, and the hard portion of the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the holes of the belt.

21 (new). The pair of swimming goggles according to claim 15, wherein the holes corresponding to the projections of the eye cup portions are provided on the hard portion of the belt.

22 (new). The pair of swimming goggles according to claim 17, wherein the holes corresponding to the projections of the eye cup portions are provided on the hard portion of the belt.

23 (new). A belt for a pair of swimming goggles comprises a connecting/disconnecting mechanism, wherein the belt is connected to an eye cup portion of the swimming goggles which protects a user's eyes, and the connecting/disconnecting mechanism is used when the user puts the goggles on and off his/her head.
